

LTC Safety Policy

Our most critical *Quality* requirement is our commitment to fully integrate Environmental, Health, Safety and Security (EHS&S) concerns into our management principles, systems and practices. We sustain this by...

- Establishing and publishing annual EHS&S goals.
- Senior Management's confirming, supporting, and promoting these goals.
- Reviewing performance against these goals, weekly, monthly and quarterly.
- Communicating EHS&S performance results.
- Holding associates responsible for both goals and results.
- Improving our EHS&S performance, continually.
- Meeting or exceeding EHS&S customer, regulatory, legal and other external and internal requirements, *responsibly*.
- Doing "right things right" the first time.
